I nipoti che fanno rivivere la fabbrica del nonno

La famiglia Piana della Grafoplast di Predosa (Alessandria): papà Silvano con Valentina e Giovanni

DANIELE PRATO
PREDOSA (ALESSANDRIA)

Sono giornate piene, alla Grafoplast di Predosa, nell'Ovadese. C'è una rete di vendita da ricostruire, una struttura da riorganizzare. «Vorrei dire che ce la faremo per fine dicembre ma, in un'ottica più realistica, dico che il lavoro sarà completato per inizio febbraio» spiega Giovanni Piana, 30 anni, neo amministratore delegato dell'azienda. Quella che suo nonno, stesso nome, aveva fondato nel

1963 e che oggi il nipote, tornato apposta dall'Inghilterra, si è ricomprato con la sorella Valentina, 32 anni, dalla multinazionale americana 3M, che il 29 giugno, con un fax di poche righe, aveva annunciato di voler chiudere lo stabilimento alessandrino di identificativi per impianti elettrici civili e industriali.

Non un sito in crisi, sia chiaro, ma «non più strategico» nel vasto universo targato 3M. A vendere l'azienda alla multinazionale, nel 2008, era stato il

papà di Giovanni e Valentina, Silvano Piana, ricevuta un'offerta che, in quel frangente, non sarebbe stato saggio rifiutare. Ma nove anni dopo, certi che restando alla finestra l'azienda avrebbe chiuso, con pesanti contraccolpi per i suoi 42 lavoratori, la famiglia ha deciso di rifarsi avanti. Anche in risposta all'appello lanciato, con una voce unica, dal territorio, che non ha accettato di perdere un'altra delle sue attività. In salute, oltretutto.

SUPPORTI

In 1963 Grafoplast was founded by Giovanni Piana, a brilliant Italian entrepreneur who developed a revolutionary wire marking system, patented under the name "Trasp". It immediately stood out from competitive ones thanks to the exceptional clarity of the marking, the long-lasting resistance over time and the easy use.

From then on, it has been a continuous and never ending growth so that in 2008 Grafoplast became one of the most prestigious companies in the sector, attracting on itself the attention of some multinational corporations, one of which acquired it towards the end of the same year. After almost 10 years, in November 2017, the Piana family, who had founded Grafoplast in 1963, decided to reacquire the company with the strong will to relaunch it worldwide, promoting the Made in Italy and the fundamental historical values of the company as quality, innovation and customer satisfaction.

Nowadays Grafoplast is recognized as a specialist in the identification systems for electrical engineering and industrial automated market but also in sectors such as: installations and equipments, energy plants, power distribution and transformation. Grafoplast grants maximum efficiency and reliability of its products, in compliance with the international work-wide quality standards, thanks to its experience of more than 50 years in the design of new products made with highly selected materials.

The HQ covers 8000 sq. mt and it is located in a strategic area that spreads over 20.000 sq. mt in the middle of the famous Industrial triangle made by the cities of Genoa, Milan and Turin. Internally, great attention is paid to technological progress and work efficiency, that's why Grafoplast has equipped itself with an automated warehouse that allows orders to be shipped within 48 hours from their receipt and to have an always updated inventory.

SI2KPRINTUNO

In Italy the Sales Network is made up of over 60 specialized professionals working in the field, while the presence on foreign markets is constantly expanding with over 80 authorized distributors in Europe and outside Europe. Aiming at an excellent customer service, technical assistance is guaranteed through a dedicated telephone line and, to solve problems even faster, the remote connection of the specialized Grafoplast technician allows immediate solutions.

From **TRASP manual system**, Grafoplast has increased its product range with **EVOMAX²**, the thermal transfer system able to boost up the marking from cables, wires, T-blocks and equipments up to push buttons, name plates and customized plates with logos, barcodes and graphical icons.

The consumables have been enriched by the **UV Technology Series**, the result of the latest Grafoplast patent, made of photoluminescent and phosphorescent materials to give maximum visibility in the dark. Thanks to this new products line, the maintenance work on the plants has become even easier and safer.

The **TWIST system** includes roll printers with a compact design, ideal to mark on site flat tags, heat shrinkable materials and adhesive labels in the industrial field. In 2019 Grafoplast has started selling the **hand-held printers EGO** again; these smart portable printers allow to mark anywhere and on various supports and materials. The wide range of consumables, the flexibility of the holders and sleeves and the Tools are able to give a solution to all types of applications.

Customer satisfaction

Prompt deliveries, price competitiveness, continuous innovation and investments in Research and Development are the “engine” of Grafoplast that has been always ready to guarantee high level of performance and quality of its products to meet the needs of its justly demanding customers.

OVERVIEW

The evolution of SI2K thermal transfer system is called EVOMAX². This Grafoplast™ unique system is recognized for the high levels of quality, reliability and performance, able to enhance the marking of the electrical components at a reasonable cost. You can also print high-resolution logos, barcodes and graphic symbols by creating customized plates lasting over time. Compact size printer, equipped with the new high precision **QC Loading** to optimize operating time and with parametric sensors that allow the consumption optimization and the maximum execution accuracy. The complete range of consumables satisfies all industrial identification needs, from cables, T-blocks and equipment up to the marking of push buttons, name plates, modular strips and customized plates.

STRENGTHS

Free to choose automatic or manual mode.

The printer is equipped with automatic feeder that can print independently more than 1000 tags for cables or T-blocks with a considerable saving of the operator time. Alternatively it can also work in manual mode to guarantee high flexibility.

Up to 8500 cable tags/h to satisfy even the most demanding requests;

High resolution print (300 dpi) in black or colors with special resin base ribbons to ensure precise and long lasting marking.

Immediately ready for use even after a long period of inactivity.

It requires minimal maintenance thanks to the integrated cleaning set and the quick change of the ribbon makes the use very simple. The tags to be printed are assembled in modules to be easily and quickly inserted in the printer.

TECHNICAL SPECIFICATIONS

Type	Desktop Industrial printer
Technology	Thermal Transfer
Loading	Automatic and manual
Resolution	300 dpi
Printable area	54x496 mm (h x l)
Max printing area	80 x 500 mm (h x l)
Dimensions	423 x 240 x 208 mm
Weight	9,5 Kg
Compatible with operating systems	Windows XP (64bit), Vista, 7, Win 8 e 10
Compatible with graphics format	.gif, .jpg, .jpeg, .bmp, .wmf.
Print Speed	Up to 60 mm/s
Ribbons	black, red, silver, gold, white, blue, green
Cleaning Set	Cleaning roller and cleaning cassette
Interface	USB
Operating Conditions	from +15°C to +32,5°C; from 10% to 85% Rh
Supply	from 100V to 240V AC, 50/60Hz
Display	backlight LCD

the dark.

UV TECHNOLOGY

UV TECHNOLOGY

The new solution designed and patented by Grafoplast™ to optimize the efficiency of the marking in the absence of light or blackout, making the operations of installation and maintenance even easier and in extreme safety. These are high performance products made of photoluminescent and phosphorescent materials to give maximum visibility in the dark and printable with EVOMAX² system.

LABELUX

The new series of consumables for the inside panel: tags for cables and T-blocks in polycarbonate mixed with fluorescent pigments, which are invisible in daylight conditions, but absorb energy from UV light and give off the energy absorbed as intense light becoming retro-enlightened.

LABELPHOS

The new series designed specifically for the external panel: strips and plates containing high-intensity 410 μm phosphorescent pigments which, absorb energy by exposure to a natural or artificial light source and then slowly release it at a low intensity by lighting in the dark. The pigments shine remaining visible up to 12 hours from exposure.

High quality in compliance with the strictest regulations and exceptional advantages enrich the marking helping to stand it out!

High Performance Roll Printers.

TWIST&YOU

TWIST&PRO

TWISTPRO

Thermal Transfer Roll Printer is the solution guaranteed by Grafoplast™ to ensure maximum performance in the marking of flat tags and adhesive labels in the industrial market.

Small in size for easy integration into the workplace, it is suitable for intensive use ensuring unrivaled productivity and print quality complying with the strictest standards in force.

Innovative features guarantee to print also on heat shrinkable material in continuous or pre-cut roll. The automatic centering, the easy change of ribbon, the LCD touch screen, make the use even easier and more intuitive.

It works with the SimploX software and it is equipped with a perforator that allows the pre-cut of the labels at predefined lengths to make the application on the cables even easier and faster.

TWIST YOU

Thermal Transfer Roll Printer, is the economical but highly performing proposal of Grafoplast™ for the marking of flat tags and adhesive labels in the industrial market.

Smaller in size than TwistPro, saves space without losing functionality; ideal for those who need an entry level printer, but with unbeatable reliability.

Fast, quiet, suitable for intensive use, it ensures unrivaled productivity and print quality complying with the strictest regulations in force.

The automatic centering, the easy change of ribbon, the LCD touch screen, make the use even easier and more intuitive.

It works with the SimploX software developed by Grafoplast™

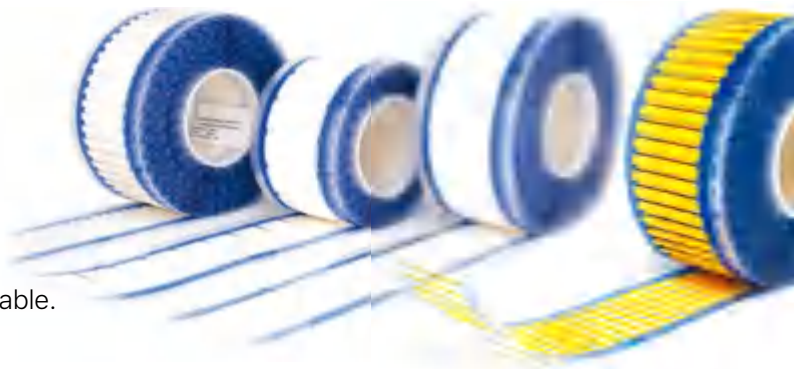

ITEM CODE	DESCRIPTION
TWISTYOU	Printer

Technology	Thermal transfer
Resolution	300 dpi
Print area	105 mm
Size	264mm x 245mm x 412mm
Weight	5 Kg
Compatible with operating systems	Windows, XP, Vista, 7, Win 8 e 8.1
Print Speed	from 30 mm/sec up to 125 mm/sec
Ribbon color	Resin Black Color
Supply with	100-240 V, 50/60 Hz

Trasp is the only manual system that allows to identify with the same process and marking elements all types of cables, wires, terminal blocks and electrical components and in general all the surfaces that offer no hook.

It is combined with a wide range of application supports in order to offer a solution for all types of needs by changing only the final plastic support to put on the cable and on the electrical equipment. Ideal for those who need a very flexible manual system or work directly on site, maintaining maximum performance.

TARGA **SYS**
MANUAL

Targa is the ideal marking system even for harsh environments.
Available in stainless steel and pvc.

CREATE YOUR GRAFOPLAST™ CODE

Cut the transparent holder or the channel at the required length with the appropriate pliers. Insert the characters into the transparent holder or into the channel, remembering to insert blank elements at each end of the text to underline the marking.

Fasten the holder or the channel with straps or, on flat surfaces, use either self-adhesive tape or screws.

SLEEVES & TOOLS

The background features a light gray network diagram with circular nodes connected by thin lines. A prominent dark green diagonal stripe runs from the bottom left towards the top right, partially overlapping the network pattern.

Include sleeves, channels, straps, tags holders to house all the marked tags by simply inserting, sliding or applying pressure. The use of these holders allows a quick replacement of the marked tags.

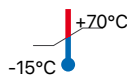

TRANSPARENT SLEEVE 100 SERIES

The shape and the material make it particularly appreciated for its rigidity and precision.

COMPACT HAND HELD LABEL PRINTER

It allows to create long lasting, durable labels. The labels ensure quick and easy identification of cables, faceplates, sockets, switches, consumer units and other components.

- Create durable labels up to 12 mm in width;
- Dedicated functions for common labelling tasks;
- 200 symbols including electrician, audio visual and Network Infrastructure;
- Built-in cutter for accurate labelling.
- Includes AC adapter, 1 flexible tape 9 mm and handy carry case

With dedicated functions and smart keys to make common labelling tasks quick and easy, and everything supplied in a hard carry case, **EGO4YOU** is an invaluable tool for electricians and other professional installers.

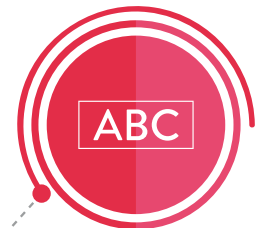

GRAPHIC DISPLAY

It allows to view the symbols such as Electrical, Audio/Video, Security and Network Infrastructure. and the label print preview

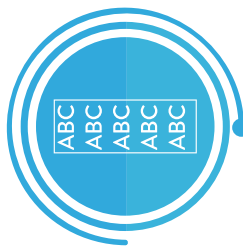

PRINT SPEED

Up to 20mm per second

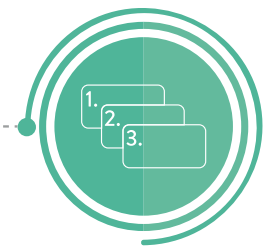

LABELS FOR MASKS

Quick identification of faceplates, sockets, switches, consumer units and other components.

WRAP AROUND LABELS

For cables, it allows to quickly mark cables with labels easy to read.

SEQUENTIAL NUMBERING

Printing multiple labels with sequentially incremented numbers. This makes label creation fast and efficient.

FLAG TYPE LABELS FOR CABLES

Just select the cable diameter to print a perfect label.

DEDICATED NUMBER KEYPAD

It allows quick entry of numbers with one finger.

200 SYMBOLS

Including icons/symbols on your labels, from categories such as Electrical, Audio/Video, Security and Network Infrastructure.

Laminated tapes, incredibly durable in extremes temperatures, water, sunlight, abrasion, chemicals, easy peel system, strong adhesive.

MULTIFUNCTIONAL HAND HELD LABEL PRINTER

Thanks to its simple functionality assures a professional long lasting labelling. The labels ensure quick and easy identification of cables, faceplates, sockets, switches, consumer units and other components.

- Large backlit LCD screen;
- QWERTY keyboard + dedicated functions for an easy use;
- Create labels up to 18 mm wide.
- Includes AC adapter, 1 strong laminated tape 18 mm and handy carry case.

In electrical and datacom installations, clear, robust labelling is crucial and the EGO1PRO with carry case has been designed to make the process easier than ever before. The label material is laminated and rigorously tested against all crucial degrading effects for clear and professional-looking for years to come.

Laminated tapes, incredibly durable in extremes temperatures, water, sunlight, abrasion, chemicals, easy peel system, strong adhesive.

Smart hand held label printer PC connection

Smart and efficient label printer to create durable labels for electrical or datacom installations through built-in labelling functions, PC software, or from smartphone or tablet with the cable labelling app.

- Large backlit LCD screen;
- Automatic (full and half) cutter;
- Print labels up to 24 mm.
- Comes with carry case, wrist strap, USB, CD Software, 2 tapes (1 strong tape 24 mm wide and 1 flexible tape 12 mm wide), rechargeable lithium-ion battery, AC adapter;

Ensuring that cables, conduits, switches and sockets are clearly identified with long-lasting, durable labels is essential for electricians, datacom, telecom and security equipment installers. EGOSMART creates labels that help address ANSI/EIA/TIA-606A/B and that meet the UL-969 standards.

LARGE BACKLIT LCD SCREEN
It allows to view the symbols and the label print preview

LABELS UP TO 24 MM
To make printing labels up to 24 mm wide

AUTOMATIC CUTTER
Facilitates the cut of the labels.

SPECIAL LABELS
It allows to quickly print various types of labels such as wrap around, ag ones, punch down

SEQUENTIAL NUMBERING
Printing multiple labels with sequentially incremented numbers. This makes label creation fast and efficient.

384 SYMBOLS
Including icons/symbols electrics, datacom, AV and safety

MERGE DATA
It allows to load data from PC to print labels directly on site

USB & Wi Fi
To print from PC or mobile wireless

Laminated tapes, incredibly durable in extremes temperatures, water, sunlight, abrasion, chemicals, easy peel system, strong adhesive.

**SIMPLE AND
EFFICIENT
ORGANIZATION**

Design labels on your PC or Mac, and include images or company logos, barcodes, frames and special symbols. Or connect to your Apple or Android device using Bluetooth, then use the proper apps to create and print labels from your smart device. AlterEGO is ready to print a label wherever and whenever you want. Comes with flexible tape 24 mm wide and USB.

Windows & OS

- Print durable, colorful labels up to 24 mm in width;
- Built-in rechargeable lithium-ion battery;
- Recharges from any available USB port ;
- It allows to link to text contained in an Excel or .csv file to easily print multiple labels with variable information;

Android e iOS

- It allows to edit your labels and then preview before printing directly from smartphone or tablet;
- Free download from app store;
- Bluetooth connection makes its use very simple;
- It allows to insert logos, images, frames, barcodes and QRcodes;

WIDE RANGE OF TAPES

To choose the proper label according to the application needed is fundamental, that's why Grafoplast offers a variety of tapes to cover all kind of applications.

The SI2000 Plotter System was the evolution of the Trasp manual system; it allows to identify all the electrical components.

The marked tags are quickly applicable to all the electrical components and guarantee a high resistance to aging, rubbing and oils.

Some markers created using the plotter are also fully compatible with the range of holders from the TRASP system.

The SimploX software can be easily used also by less experienced operators.

Siglatura.it

Your Marking onDemand

“

Siglatura.it offers a quick and easy service for those who need tags already marked to identify cables, wires, t-blocks, equipment, push buttons and panel plates.

The long experience in the identification system in Italy and abroad allows us to make fast deliver for each type of tag and to provide new solutions according to customers needs.

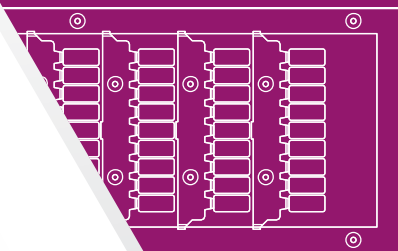

Our expertise includes the marking of internal and external panel but also safety signs and identification in particular harsh environments as Petrolchimic, Marine and Food market.

We can be your identification department!
